# Introduction

CoolTShirts, an innovative apparel shop, is running a bunch of marketing campaigns. In this project, the aim is to help them by answer these questions about their campaigns:

**1. Get familiar with the company.**

- How many campaigns and sources does CoolTShirts use and how are they related?
- What pages are on their website?

**2. What is the user journey?**

- How many first touches is each campaign responsible for?
- How many last touches is each campaign responsible for?
- How many visitors make a purchase?
- How many last touches on the purchase page is each campaign responsible for?
- What is the typical user journey?

**3. Optimize the campaign budget.**

- CoolTShirts can re-invest in 5 campaigns. Which should they pick and why?

*The company CoolTShirts is imaginary and the data is taken from Codecademy. SQLite, Tableau and Excel have been used for the analysis.*

# Get familiar with CoolTShirts

- **UTM source** answers the question “Where is the traffic coming from to the website?”
- **UTM campaign** answers the question “Why is the traffic coming to the website?”
- There are 8 different campaigns set in 6 different sources in the data table.
- There are four different page names :
  1. landing\_page
  2. shopping\_cart
  3. checkout
  4. purchase
